

Reporting the Future: A Handbook for Afghan Journalists

IWPR
English

Reporting the Future handbook is designed to help Afghan journalists in three ways. First, it serves as an explanation in their own language to many of the ideas and concepts behind international journalism. Second, it provides practical guidance, including twelve separate exercises, on many of the basic techniques of journalism. Third, the glossary at the back is intended to serve as a reference to explain and introduce many concepts which may be new to Afghan journalists.
