

CyberArabs, Issue 7 (Arabic)

IWPR Middle East
Arabic

This is the seventh issue of Cyber Arabs (cyber-arabs.com), a magazine covering digital security issues in the Arab world. Secrecy, or concealment, is a major principle of broader digital security. It is vital that we keep our secrets safe so that anyone trying to snoop around cannot find easy ways in.

This edition of Cyber Arabs explains the tools and apps that will help you safeguard your secrets and hide your files from outsiders.

Imagine someone is looking for information on your computer. They will simply find notes on your last visit to the cinema or a tasty cooking recipe, and will have no clue that these innocent-looking files contain and conceal confidential information.
