

CyberArabs, Issue 8

IWPR Middle East
Arabic

This is the 8th and final issue of Cyber Arabs (cyber-arabs.com), a magazine covering digital security issues in the Arab world. Cyber Arabs will continue to provide you with information and stories from the world of digital security on our website. From now on, you will find articles as they come in and go up on the site, giving you even faster access to news and alerts.

In this final issue, Cyber Arabs helps you navigate through the world of cloud-based services, so that you can pick the best (and safest) online storage method to suit your specific needs.

This edition also provides an introduction to Tails, a live operating system that will help guard your privacy, use the internet anonymously and leave no traces behind. Tails allows you to encrypt files, emails and instant messaging. Sounds like a magic tool? Try it.
